

■ HOW TO INDICATE STAINLESS STEEL CASE AND SPRING MATERIALS

The deVries International part-numbering system assumes the use of carbon steel cases and springs. If you wish to use stainless steel, one of the codes below must be added to the part number. It follows the elastomer code:

COMBINATION OF CASE AND SPRING	CASE	SPRING	CODE
For both stainless steel case and spring	S	S	S/S
For stainless steel spring only, case of carbon steel	X	S	X/S
For stainless steel case only (either the spring is to be carbon steel or no spring, such as a "V" or "K" lip style)	S	X	S/X

Assume you wish to order Example 1 from page 36 with a stainless steel case and stainless steel spring. The complete part number is:

07501375-438SAX-PVS/S

37

Assume you wish to order Example 2 from page 36 with a stainless steel case and carbon steel spring. The complete part number is:

900011250-1125TAX-CPA S/X
